EN General

This manual describes the installation, operation and maintenance of the unit and serves as an important source of information and reference. The knowledge of all safety instructions and handling instructions creates the conditions for the safe and proper operation of this machine. Moreover you have to respect the norms for the application of the instrument applicable to local safety regulations and general safety rules. The manual is part of the product and has to be available in the immediate vicinity of the device for the installation, operation, maintenance and cleaning personnel at all times.

EN Declaration of conformity

We certify in the EC declaration of conformity, that our product complies with current standards and directives of the EU.
If required we will be glad to send you this document.

EN Safety and Usage Instructions

The unit is built to the current rules of the art. Danger could be generated with this appliance, if used improperly or not according to specifications. The knowledge of the contents of the manual is one of the requirements to protect you from danger, and to avoid mistakes and to operate the device safely and smoothly.
To avoid danger and to ensure the optimal performance, no modifications or alterations may be made which have not been specifically authorized by the manufacturer. The device may be operated in a technically flawless and reliable condition.
The information on occupational safety is related to the current regulations of the European Union valid at the time of manufacture of the device. The operator is required to determine the conformity of the designated safety measures with the current state of regulations and comply with new regulations during the entire life of the equipment. Outside the European Union the site of operation applicable safety laws and local regulations have to be respected.
In addition to the safety instructions in this manual you must follow and comply on generally applicable safety and accident prevention regulations for the range of the instrument and the applicable environmental regulations.
önlemlerini uygulamalıdır.

EN Instructions for use

This unit is designed for commercial use. Designed, constructed and operated only by qualified personnel in professional kitchens. The reliability of the device is only guaranteed if used as specified in the manual. All technical procedures, including the erection and maintenance shall be performed exclusively by a qualified service technician.

The contact grills are intended only for cooking of bread, toast, panini, scampi, etc..

This device is not determined to be used by individuals (including children) with reduced physical, sensory or mental abilities or lack of experience and / or knowledge, unless they are supervised by a person responsible for the safety or have received instructions on how to use the device.

PLEASE NOTE:

- Children should be supervised to ensure that they do not play with the device.
- Keep this instructions carefully. If the device is passed to a third person, the manual must be handed over.
- All persons using the equipment must comply with the specifications in the manual and follow the safety instructions.

Only operate the machine in enclosed spaces.

Any use of the device beyond its intended use and / or otherwise is prohibited and is considered to be improper. Any claims against the manufacturer and / or its agents for damages resulting from improper use of the equipment are excluded. If not used properly the operator is liable for all damages alone.

EN Installation and Connection of the Contact grill

Safety instructions

WARNING! Electric Shock Hazard!

- The unit may be operated only from properly installed electrical outlets with a single touch!
- Device can cause injury if not correctly installed!
- Prior to installing the data of the local power grid must be compared with the technical specifications of the device (the type plate)!
- Connect the device only in accordance!
- Do not unplug the device from the socket with the cord!
- The power cable must not come into contact with hot parts!
- Make sure that the cable is exposed to heat sources and not in contact with sharp edges!
  Do not let the cord hang down from the table or the bar!

WARNING! Hot Surface!

During the operation, some parts of the appliance become very hot. To avoid burns, do not touch the hot parts of the device!

- Do not use this appliance if it is not working properly, damaged or dropped to the ground.
- Do not use any accessories or spare parts that were not recommended by the manufacturer. This could pose a danger to the user or cause damage to the equipment and cause personal injury. In addition the warranty expires.
- Do not route cables over carpeting or other heat insulation. Do not cover the cables. Keep the cables away from work areas and do not submerge in water.
- Do not pull the cord for moving the device. Before moving the unit always disconnect the power cord.
- Do not wrap the cord around the device and do not bend it.
- Protect the device from rain water, humidity and moisture.
- During operation do not move and do not tip over the device.

ATTENTION!

The installation and maintenance of the equipment must be carried out only by qualified personal!

- Unpack the unit and remove all packing material. Peel off the protective cover from the device. If adhesive residue remains, remove them with a suitable solvent.
- To handle the weight of the device place the unit on a flat and safe place which is not heat sensitive.
- Do never place the device on a flammable surface (such as: table cloth, carpet, etc.) or in the vicinity of combustible and flammable materials.
- Do not place the unit near open fires, heaters or other heat sources.
- Maintain a minimum distance of 20 cm from all sides.
- Set the device so that the plug is accessible to disconnect the device quickly from the network if necessary.

EN Operation

Please follow the steps below before first usage of your contact-grill:

- Connect the equipment into a grounded single outlet. The unit must be grounded in a sufficient manner.
- Turn on the unit by pressing the POWER-switch. The power indicator light (red) lights up.
- **Preheat the device at 200°C and leave it on for about 1 hour. Escaping industrial fats from inside can lead to smoke. This smoke is not harmful and will be there no longer on subsequent use of the device.**
- **Spray griddle plates with a release fat for three to four times. Thus, the rough-cast pores will be closed and there is a separate coating.**
- Set the desired temperature (300°C). The optimum temperature for grilling is in the range 200° to 250°C. The heating time is about 15-20 minutes.
- After setting the desired temperature, the temperature indicator light (green) lights up, indicating that the unit is heating up.
- Take the unit into operation.
- To switch off the device, bring the thermostats in position "0" and the POWER-switch to "OFF".

WARNING! Risk of burns!

The unit will become very hot during operation! Do not touch the hot surfaces of the device. Use the handle of the device.

WARNING!

Do not clean the device directly with a water jet! So not use a pressure water jet. Allow to cool, before cleaning the device!
